

FEATURED ALUM-A-LIFT
 CLEANROOM ROLL LIFTER FOR BATTERY MANUFACTURING

PROJECT
31235

MODEL B350CS-72

FEATURING Swiveling V-Trough with Hoist Rings

HANDLING 350 lb [159 kg] Rolls

DETAILS Manufacturing custom advanced battery systems involves small batch work in cleanrooms to minimize possible contamination. This Alum-a-Lift features a swiveling v-trough and hoist rings, which allows rolls of material to be handled either by the outside or through the core with the use of a strap. This means a single lift can be utilized in many areas of the cleanroom. The +/-45° swivel on the v-trough allows for easy alignment of the rolls on the equipment in the oftentimes tight quarters. Accompanying the lift are multi-spindle sealed cleanroom carts to separately store anode and cathode material when not in use.
