

FEATURED ALUM-A-LIFT
LIFT WITH SHUTTLING PRONGS FOR COMPUTE ELEMENTS

PROJECT
30539

MODEL A800CLR-96

FEATURING Shuttling Dual Prongs with Sense For Presence and Indicator Lights, Manual Lateral Float Module, Spring Overload Safety Device, Removable Docking Fixture, Side Push Handles, and Low Profile Base

HANDLING 120 lb [54 kg] Compute Elements

DETAILS Alum-a-Lift is a great fit for rackmount components of all types, including highly specialized hardware. This lift features a dual prong set with presence-sensing switches and indicator lights which tell the operator when prongs are fully engaged. The docking feature allows for consistent alignment at the rack. A load-sensing module prevents damage due to overtravel.
