

FEATURED ALUM-A-LIFT  
 VACUUM FLANGE LIFTER WITH MANUAL ROTATION

PROJECT  
**32139**

**MODEL** L200CS-72

**FEATURING** 360° Manual Trunion Rotation, UHMW Hold Down Arms, Light Weight Construction

**HANDLING** 30 lb [9 kg] Oxygen Chamber Lids

**DETAILS** Created to remove, manipulate, and aid in the service of oxygen vacuum chambers, this lift's small footprint, light weight construction, and easy operation is ideal for a lab or test center. For this application, the lift was created to remove the flanged lids from the oxygen chamber, and secure them before rotation. The hold down arms allow the operator to safely flip the lids before placing them on a work bench or test stand. The ease of use makes the task simple, efficient, and safe for the operators.
