

FEATURED ALUM-A-LIFT
 SMALL FOOTPRINT UPS BATTERY HANDLING LIFT

PROJECT
29459

MODEL A800CLR-60

FEATURING Swiveling Hoist Rings, Swiveling Boom, High Capacity Linear Bearings, Low Profile Legs, Counter Mass

HANDLING 275 lb [125 kg] Batteries

DETAILS This lift was configured to support the period change out of UPS (Uninterruptible Power Supply) batteries. This UPS battery handling equipment features a compact footprint for travel in narrow aisles. Suitable for racks where spill containment is not present, the lift's low-profile legs can pass underneath standard 2-tier racks. A swiveling boom enables the lift to engage batteries with a sling while its legs are positioned between the rack's vertical supports.
