

FEATURED ALUM-A-LIFT
ELECTROMECHANICAL ASSEMBLY LIFTER AND WORKSTATION

PROJECT
32582

MODEL L200CS-60

FEATURING Channel Forkset, Manual Trunion, Quick Release Pins, Low Profile Legs, Foot Operated Floor Brake

HANDLING 100 lb [45 kg] Assemblies

DETAILS More than just material handling equipment, this compact, lightweight work positioner supports many stages in the manufacturing of aerospace subassemblies. This ergonomic lifter safely and precisely lifts and rotates aerospace components for assembly, inspection, and quality control. Quick release pins secure the aircraft assembly while it is being held by a custom fixture. Low profile legs easily glide under test benches. A central floor-brake provides stability during inspection.
