

FEATURED ALUM-A-LIFT  
**DIFFUSION QUARTZ TUBE CLAMP LIFT**

PROJECT  
**31476**

**MODEL** B350CRCS-66

**FEATURING** Interchangeable Clamp Pads with Safety Strap, Precision Powered Clamp, Extended Reach, Tilt Up/Obstacle Encounter, ISO 5 (Class 100) Cleanroom

**HANDLING** 100lb [45 kg] Quartz Tubes & Silicon Carbide Liners

**DETAILS** Handling and cleaning quartzware is an important step in the Diffusion process for the Semiconductor industry. Quartz tubes and silicon carbide liners must be handled and placed into a parts cleaner according to a PM schedule. Quartzware is delicate and expensive to replace if damaged. A soft touch precision clamp ensures an accurate and repeatable force is placed on the quartzware to ensure a secure engagement. A detachable safety strap can be used as an added safety feature and the extended reach ensures an ergonomic placement into the washer.
