

FEATURED ALUM-A-LIFT
 ROLL HANDLING LIFT WITH SHUTTLING FORKSET

PROJECT
33294

MODEL A1500CSLRPD-96

FEATURING Notched Forkset, Powered Lateral Shuttle, Steerable Powered Drive Wheel

HANDLING 772 lb. [350 kg] Rolls

DETAILS This custom lifting hoist was designed to lift special proprietary rolls ranging in size from 25" - 90" through a 9.5' doorway. A powered side-shift module makes it easy for the operator to get precise positioning at full elevation, unlike a mass-produced solution. Custom fabricated arms and plastic lifting cradles are sided to the exact roll measurements. The through shaft is placed in the roll and the lift's notched forks pick up on the shaft on the pallet.
