

FEATURED ALUM-A-LIFT
CLEANROOM INCUBATOR LIFT WITH ADJUSTABLE FORK SET

PROJECT
33745

MODEL B350CRCS-72

FEATURING Class 100 (ISO 5), Stainless Steel Construction, Adjustable Fork Sets with Retaining Fingers

HANDLING 220 lb [100 kg] Incubators

DETAILS Proper handling of incubators requires careful placement, frequent cleaning, and specific temperature settings to ensure ideal conditions for cell culture or hatching. Our cleanroom incubator lift is built to avoid contamination and reduce particle emissions. It features a stainless steel design and Grade-B (ISO-5; Class 100) cleanroom compatibility, making it highly durable, resistant to chemicals, and easy to clean. It is ideal for pharmaceutical manufacturing in cleanrooms. Additionally, the lift has adjustable forks with retaining fingers to keep incubators secure during transportation.
