

# FEATURED ALUM-A-LIFT HEAVY-DUTY TELESCOPING LIFT WITH FIXED FORK SET

## PROJECT 35015

**MODEL** A800CST-78/78

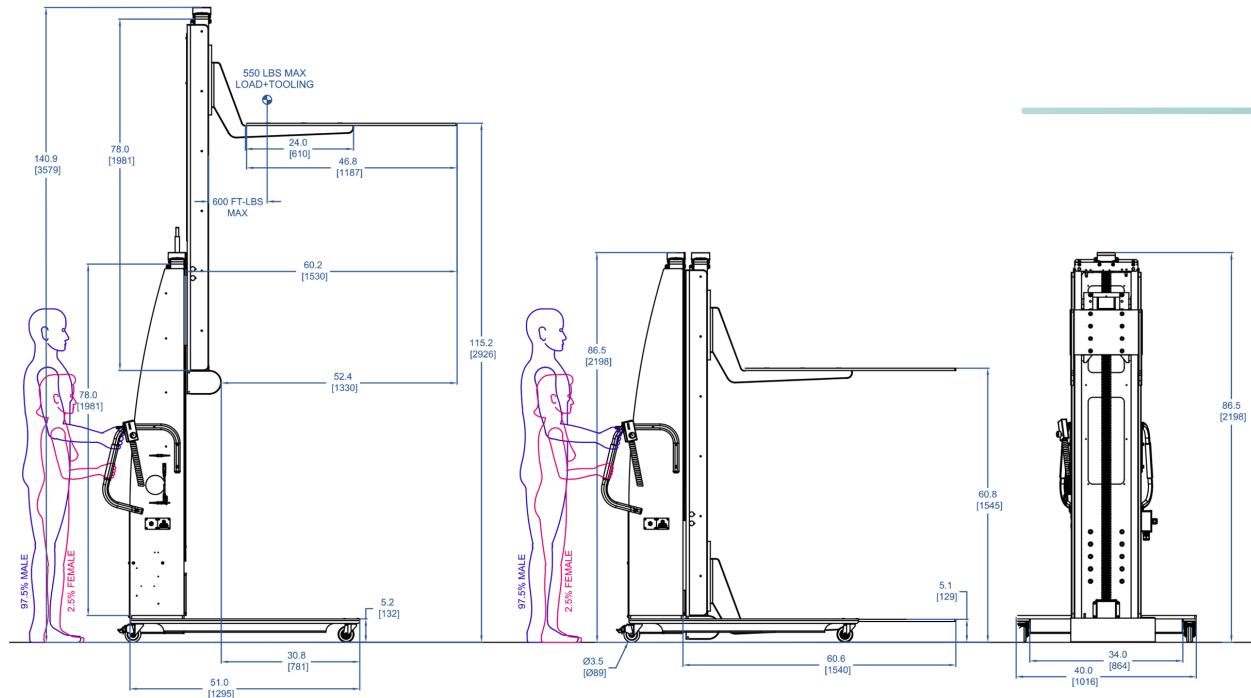

**FEATURING** All-Electric Drivetrain, Telescoping Mast, Fixed Fork Set

**HANDLING** 550 lb [249 kg] Aircraft Assemblies

**DETAILS** Selecting the right material handling solution for aerospace manufacturing requires careful consideration of the specific needs of the operation, including factors like how the handling equipment will integrate into the overall manufacturing process, and the need for custom fixtures and tooling.

Alum-a-Lift dedicates time to comprehend the needs of the application and collect exact specifications for each project, while also addressing real-world off-center loading scenarios, which are the leading cause of failures in lift systems.

Our heavy-duty telescoping lift allows operators to safely and efficiently move heavy aircraft assemblies through doorways without compromising the vertical lifting stroke. It integrates flawlessly with their existing equipment, offering a strong solution for their operations.
