

FEATURED ALUM-A-LIFT  
 POWERED DRIVE LIFT SYSTEM WITH OVERHEAD FORK SET

PROJECT  
**35865**

**MODEL** C1500CRCSLRPD-84

**FEATURING** Powered Drive Wheel, Powered Lateral Shuttle, Class 100 Cleanroom (ISO 5), Folding/ Removable Fork Set

**HANDLING** 551 lb [250 kg] Electronic Components

**DETAILS** This Alum-a-lift is specifically designed for operation in a class 100 (ISO 5) cleanroom, intended for managing high-performance electronic devices that facilitate the rapid development of semiconductor chips. It includes an end-effector equipped with powered shuttling for accurate alignments, a gusseted overhead fork set featuring hoisting rings to minimize sway or oscillation, and safety modules that are calibrated to the lift's weight capacity.

The fork set can either fold down or be detached for storage, helping to conserve floor space in the cleanroom while ensuring adequate airflow.
