

FEATURED ALUM-A-LIFT
SUPER DUTY ROTATING INTERNAL CLAMP LIFT

PROJECT
36156

MODEL A2500CSLRPD-78

FEATURING Powered Drive Wheel, Super Duty 360° Rotation, Powered Internal Clamp w/ Clamp-Force Limiter

HANDLING 1500 lb [680 kg] Ring Assemblies

DETAILS A client required an ergonomic solution for transporting and rotating 1500 lb. ring-shaped hardware. Our internal clamp lift engages the ring's inner diameter, offering 360° powered rotation and extends beyond the legs to lift rings from floor level. It includes a powered drive wheel for walk-behind operation, minimizing manual manipulation.

Additionally, the powered clamp is equipped with force limiting sensors, which guarantee a steady grip and prevent any damage to the ring assemblies due to excessive force.
