

FEATURED ALUM-A-LIFT ISO 6 CLEANROOM LIFT WITH SWIVELING SHUTTLE

PROJECT 35623

MODEL C800CRCLR-72

FEATURING ISO 6 (Class 1,000) Cleanroom Compliant, Forward Shuttle, Side-to-Side Pivot, Interchangeable Fixtures

HANDLING 154 lb [70 kg] E-Sources

DETAILS Moving delicate parts such as particle sources and vacuum equipment within a cleanroom or controlled environment demands meticulous handling to prevent contamination, electrostatic discharge (ESD), and physical damage. Alum-a-Lift provides significant advantages for this process, especially in settings with limited space.

This ISO 6 cleanroom lift is engineered with specialized fixtures that securely engage e-sources, protecting them from accidental drops during transport. Its pivot-mounted forward shuttle allows for smooth rotation, enabling operators to unload e-sources directly onto a test bench or shelving unit. Additionally, the lift includes a detachable hoist ring for handling other miscellaneous lifting needs as required. This versatile lift eliminates direct contact, reduces the number of devices needed to accomplish tasks, and lessens contaminants in the cleanroom.

SUITABLE FOR ISO 6 (CLASS 1,000) CLEANROOM
