

FEATURED ALUM-A-LIFT
 ISO 7 FORK SET LIFT WITH SHUTTLE AND TILT INTERFACE

PROJECT
35834

MODEL A800CRCSLR-84

FEATURING ISO 7 (Class 10,000), Lateral Shuttle, Tilt Module, Deflection Compensation

HANDLING 75 lb [34 kg] Trays

DETAILS This Alum-a-Lift is designed to raise large trays to various shelf heights within a lyophilization machine, utilizing a specialized fork set, lateral shuttle, and deflection compensation system. It enables precise insertion and removal of long trays in the confined space of an ISO 7 cleanroom. The tilt and deflection compensation features address the deflection of trays and forks caused by the cantilevered load.
