

FEATURED ALUM-A-LIFT CLEANROOM OPTICS LIFTER WITH ROTATING TABLE

PROJECT 35084

MODEL A2500CSCRLRPD-72

FEATURING Powered 360° Rotation, Powered Lateral Shuttle, Powered Drive Wheel, Class 1000 (ISO 6) Cleanroom, Table with Fixed Mounts

HANDLING 800 lb [362 kg] Optical Assemblies

DETAILS Unlock the full potential of your optical components with advanced coatings that boost performance, durability, and functionality. It starts with a coating chamber designed for the uniform application of thin films to optics such as mirrors and lenses. To ensure the utmost care, specialized lifts are essential for safely loading and unloading delicate assemblies, eliminating the risk of contamination or damage.

Introducing our Cleanroom Optics Lifter—purpose-built to handle substantial optical assemblies. Its innovative table, equipped with upright mounts and strategically placed pegs, securely supports your optics throughout the process. The table's manually rotating module and powered lateral shuttle provide effortless alignment, streamlining your workflow and guaranteeing precision at every step.
