

## FEATURED ALUM-A-LIFT

# CAMERA ASSEMBLIES LIFT WITH EXTENDABLE SHUTTLING BOOM

## PROJECT 35355

**MODEL** A2500CRCLRPD-68

**FEATURING** Class 100 (ISO 5) Cleanroom, Powered Drive Wheel, Powered Lateral Shuttle and Telescoping Boom

**HANDLING** 187 lb [85 kg] Camera Assemblies

**DETAILS** Assembling high-value and delicate camera equipment? Our camera assembly lift is built for that, safely lifting, positioning, and installing your components in controlled environments. Position optical assemblies in your Class 100 (ISO 5) cleanroom with precise motion.

The shuttling or extendable boom provides the kind of accurate placement of camera assemblies you've been waiting for. It reduces alignment time for maximum efficiency. An adapter with a hoist ring can be mounted to the end of the boom, making it especially simple to attach woven nylon strapping for the insertion and removal of assemblies from their cases. This lift isn't just the standard for handling processes because of safety; it ensures quality throughout your operation because of consistency with proper installation in mind from the beginning.
