

THE POWERED SS SIDE-DUMPER

PROJECT 36173

The Powered Stainless-Steel (SS) Side-Dump Lift is engineered for health-care manufacturing environments that demand both flexible handling and rigorous sanitation.

The powered lift and side-dump rotation reduce strain and help lower the risk of injuries during dumping tasks. Side rotation delivers smooth, predictable emptying of contents, improving process consistency and helping reduce spills, splashes, and product loss.

Stainless steel construction and wash-down-compatible design allow regular cleaning with harsh chemical agents, including Spor-Klenz, supporting sanitary standards in healthcare and chemical production.

Quick-exchange batteries and a compact footprint keep the lift ready for use throughout the shift, even in narrow aisles and crowded process areas.

Model

L200SS-72

Handling

Up to 110 LB [50 KG]
Drums and Barrels

Featuring

Stainless Steel,
Wash-down (IP65),
Powered 360° Rotation,
Quick-Exchange Battery System

Alum-a-Lift designs and manufactures turnkey ergonomic lifting solutions for companies around the world. Our proven solutions help manufacturers meet their material handling needs safely and efficiently.
