

## PROJECT 36300

Simple. Ergonomic. The perfect solution for loading new packaging film rolls for medicine capsule containers and other medicinal casings. Built on a standard boom mounted for manual lateral movement, the lift provides straightforward, reliable roll handling for Pharmaceutical Industry packaging operations and more.

A built-in tape measure and movable stop on the boom allow operators to quickly measure roll width and position each roll at the same mounting point every time. This accessible setup improves alignment consistency, reduces operator guesswork, and keeps roll changeovers efficient and accurate.

### Model

A800CSPD-60

### Handling

500 lb [227 kg]  
Film Rolls

### Featuring

Fixed Boom,  
Lateral Shuttle (Manual),  
Powered Drive Wheel

Alum-a-Lift designs and manufactures turnkey ergonomic lifting solutions for companies around the world. Our proven solutions help manufacturers meet their material handling needs safely and efficiently.
