

POWERED DRUM DUMPER

PROJECT 36334

The Powered Drum Dumper Lift is engineered for handling up to 30 gallons (120 L). It lifts drums directly from a pallet and rotates them forward to discharge the contents in a controlled and ergonomic manner.

To support continuous use, the unit is equipped with quickexchange (QX) batteries, enabling operators to swap battery packs without removing the lift from service for charging. Its compact footprint allows it to navigate and operate effectively in tight spaces, making it well-suited for plants with constrained aisles and crowded production areas.

Model

A800CSPD-67

Handling

30 Gallon [120 L]
Drums

Featuring

Powered Clamp,
Powered 360° Rotation,
Powered Drive Wheel,
Quick-Exchange Battery Systems

Alum-a-Lift designs and manufactures turnkey ergonomic lifting solutions for companies around the world. Our proven solutions help manufacturers meet their material handling needs safely and efficiently.
