

FEATURED ALUM-A-LIFT

SANITARY IP65 WASHDOWN BARREL HANDLING LIFT

PROJECT 35866

The Sanitary IP65 Washdown Barrel Handling Lift is engineered for safe, efficient handling of up to 800 lb. barrels of free flowing liquids and ingredients, including products such as coffee, tea, and similar materials. This system utilizes a rotating clamp with rubber pads and a chain and eyehook adapter to deliver precise, repeatable clamp force regulation, ensuring secure handling and controlled dumping of the barrel.

During operation, the lift raises the basket from the cylindrical holder and automatically dumps the contents, making it ideal for applications comparable to a mass-produced loose leaf tea or coffee grounds strainer. The clamp design supports two distinct clamp force settings, enabling operators to easily adjust for different barrel weights, materials, and product types without compromising stability or safety.

The Sanitary IP65 Washdown Barrel Handling Lift is fully washdown compatible, allowing thorough cleaning and sanitation between batches. This is especially important in food and beverage processing environments, where hygienic design helps support allergen control, reduce the risk of cross contamination, and maintain compliance with strict cleanliness standards.

Model

A1500CSLRWDPD-102

Handling

Up to 800 LB [363 KG]
Barrels

Featuring

Powered Rotation,
Powered Clamp with Rubber Pads,
Two Clamp Force Settings,
Hoist Bar, Chain & Eyehook Adapter

Alum-a-Lift designs and manufactures turnkey ergonomic lifting solutions for companies around the world. Our proven solutions help manufacturers meet their material handling needs safely and efficiently.
